INTERVIEW SUMMARY

Proposed Boarding House Management System

Person Interviewed: Brian Santos , Business Owner , Santos Boarding House

Date of Interview: August 10 , 2026

Location: Murangan , Alcate , Victoria, Oriental Mindoro

Interviewers: Mayores, Darylle F. – Project Manager
Castillo Zyreen Mae M. – Quality Assurance
Jhon Michael Gillado V. – Back-End Developer
Lardizabal , Jaira R. – Front-End Developer

Purpose of the Interview:

- To gather and analyze the system requirements for the proposed boarding house management system through an interview with the client.
- To identify the boarding house's current business processes, existing problems, and desired system features.

Summary of Interview:

- The client explained the current boarding house operations and discussed the need for a computerized system to improve efficiency, organization, and accuracy in managing daily transactions.
- The client described the existing workflow for tenant information, room assignments, rental payments, expenses, and other boarding house records, including the challenges encountered when these activities are handled manually.
- The client identified important functions for the proposed system, including tenant and room management, rental/payment tracking, monitoring of room availability, recording of expenses and utilities, notifications, reporting, and other administrative functions.

Two (2) biggest problems with the current system are as follows:

1. The current manual process makes it difficult and time-consuming to organize tenant records, room assignments, rental payments, and other boarding house information, which may result in delays, duplicate records, or human errors.
2. The lack of an integrated system for monitoring room occupancy, payment status, expenses, and other transactions makes it difficult for the owner or manager to quickly check the boarding house's current status and prepare accurate reports.

Open Items:

- Confirm the complete tenant information and registration process. (Resolved: tenants register their own accounts, and the admin can also add tenants. See FR-004 and FR-005.)
- Verify the room assignment, occupancy, and room availability process. (Resolved: see FR-001 to FR-003 and FR-006.)
- Confirm the rental payment schedule, payment status, and receipt requirements. (Resolved: see FR-007 to FR-011 and FR-021.)
- Verify how utilities, expenses, deposits, and other charges are recorded. (Partly resolved: utilities are covered in FR-019 to FR-024. Expenses and deposits are still open.)
- Finalize the online or digital inquiry/reservation process, if required. (Open: not included in this version of the system.)
- Confirm the required system reports and notifications. (Open: no reports or notifications are specified yet.)

Questionnaire:

1) What information about rooms needs to be recorded?
   Room number, building, capacity (up to 8 tenants per room), and status. Rent is one price for every tenant.
2) Should the admin be able to add, edit, deactivate, and view rooms?
   Yes. The admin should be able to add, edit, deactivate, and view rooms.
3) Should the system show room availability, occupancy, price, and capacity?
   Yes. It should show room availability, occupancy, monthly rent, and capacity.
4) What tenant information needs to be recorded?
   Name, contact details, room assignment, and move-in date.
5) Should the admin be able to add, edit, view, and deactivate tenant records?
   Yes. The admin should be able to add, edit, view, and deactivate tenant records.
6) Should the admin be able to assign tenants to rooms and view their rental history?
   Yes. The admin should assign tenants to rooms and see their rental history.
7) How are rental payments currently recorded?
   Each payment should show the amount, date, method, and payment status.
8) What payment information should be recorded?
   Tenant name, room number, amount paid, payment date, and payment method.
9) Should the system show paid, unpaid, pending, and overdue payments?
   Yes. Payments should show as paid, unpaid, pending, or overdue.
10) Should tenants be able to upload proof of payment such as a GCash screenshot?
    Yes. Tenants should be able to upload proof of payment, such as a GCash screenshot.
11) How are the electric and water bills shared among tenants?
    Each room has its own electric meter. I receive the bill and the tenants in that room split it evenly. The rest house meter runs the water pump, and all active tenants in both buildings split that bill evenly. Rent is the same for every tenant, whatever the room.
12) Who records the electric and water bills when you are not around?
    I am not always at the boarding house, so I choose one of the active tenants to look after the others. That tenant manager enters the bills each month and uploads photos of them. I can check and correct the amounts, and I can change the manager any time.
13) Do you need a record of the changes made in the system?
    Yes. I want to see who changed a record, when, and what was changed, such as a bill or a payment. Each tenant should see the changes to their own records.
14) Do you need your own copy of the GCash receipts tenants send?
    Yes. I want to download the GCash screenshots, one at a time or all of a month at once, so I have my own copy for my records.
15) Should the admin be able to verify payment proof and generate a receipt?
    Yes. The admin should verify the proof and generate a receipt.
16) Should tenants be able to submit concerns through the system?
    Yes. Tenants should be able to submit concerns through the system.
17) Should the admin be able to view, respond to, and update the status of concerns?
    Yes. The admin should view, respond to, and update the status of concerns.
18) Should the admin be able to create, edit, delete, and publish announcements?
    Yes. The admin should create, edit, delete, and publish announcements.
19) Should tenants be able to view announcements?
    Yes. Tenants should be able to view announcements.
20) How easy should the system be for the admin and tenants to use?
    Simple. The admin and tenants should be able to use it without training.
21) What devices should the system support?
    Desktop and mobile devices, through a web browser.
22) Should the system require usernames and passwords with different access levels for admin and tenants?

Yes. Each user needs a username and password, with separate access for the admin, the tenant manager, and tenants.

23) Should tenants only be allowed to access their own personal, room, and payment information?

Yes. Tenants should see only their own personal, room, and payment information.

24) What is the most important problem the system should solve, and what features are absolutely required for you to accept the system?

Tracking room occupancy, payments, and tenant communication in one place, instead of manual or scattered records.

SYSTEM REQUIREMENTS SPECIFICATION

FUNCTIONAL REQUIREMENTS

ID	Requirement	Priority
FR-001	The system shall record room information including room number, building, capacity of up to 8 tenants, and status.	**HIGH**
FR-002	The system shall allow the admin to add, edit, deactivate, and view rooms.	**HIGH**
FR-003	The system shall display room availability, occupancy, rent per tenant, and capacity.	**HIGH**
FR-004	The system shall record tenant information including full name, username, email, contact number, room assignment, and date started.	**HIGH**
FR-005	The system shall allow tenants to register an account, and allow the admin to add, edit, view, and deactivate tenant records.	**HIGH**
FR-006	The system shall allow the admin to assign tenants to rooms and view their rental history.	**HIGH**
FR-007	The system shall record monthly bills and payments including tenant name, room number, rent share, electric share, water share, total amount, payment date, payment method, and payment status.	**HIGH**
FR-008	The system shall allow tenants to view their monthly bill breakdown (rent, electric share, water share, and total), payment history, balance, due date, payment status, and receipts.	**HIGH**
FR-009	The system shall display payment status as paid, unpaid, pending, or overdue.	**HIGH**
FR-010	The system shall allow tenants to upload proof of payment such as a GCash screenshot.	**HIGH**
FR-011	The system shall allow the admin to verify payment proof and generate a receipt.	**HIGH**
FR-012	The system shall allow tenants to submit concerns and view the admin response and concern status.	**HIGH**
FR-013	The system shall allow the admin to view, respond to, and update the status of concerns.	**HIGH**
FR-014	The system shall allow the admin to create, edit, delete, and publish announcements.	**HIGH**
FR-015	The system shall allow tenants to view announcements.	**HIGH**
FR-016	The system shall allow users to log in with a username and password, open the admin or tenant dashboard based on the account, and log out.	**HIGH**
FR-017	The system shall show the admin a dashboard of rooms, tenants,	**HIGH**

	pending and overdue payments, recent concerns, and the latest announcement, and storage used with a warning at 80%, and show tenants a dashboard of their room, amount due, payment status, and latest announcements.	
FR-018	The system shall allow tenants to view and update their profile, change or remove their profile photo, and view their assigned room and monthly rent.	**HIGH**
FR-019	The system shall allow the tenant manager, a tenant the admin assigns, to enter each month the electric bill amount in pesos of each room's meter and of the rest house meter that powers the water pump, and to upload a photo of each bill. The admin may also enter or correct these amounts.	**HIGH**
FR-020	The system shall split each room's electric bill equally among the active tenants in that room (up to 8), and split the rest house bill equally among all active tenants in both buildings as the water share.	**HIGH**
FR-021	The system shall compute each tenant's monthly bill as rent share plus electric share plus water share as soon as the utility bills are saved, and show it on the tenant dashboard.	**HIGH**
FR-022	The system shall allow the admin to set, in Settings, one general monthly rent that every tenant pays and the payment due day (1 to 28). The system shall ask the admin to confirm a rent change before saving it and shall apply the new rent from the next month's bills.	**HIGH**
FR-023	The system shall allow the admin to assign any active tenant as the tenant manager, allow only one tenant manager at a time, and remove the role when that tenant is marked inactive.	**HIGH**
FR-024	The system shall allow the admin and all tenants to view each month's utility bill amounts and bill photos.	**HIGH**
FR-025	The system shall record every change to rooms, tenants, room assignments, settings, utility bills, monthly bills, payments, receipts, concerns, and announcements in a history log with the user, date, action, and old and new values. The admin shall view all history logs, and each tenant shall view the logs about their own records.	**HIGH**
FR-026	The system shall allow the admin to download the GCash proof images tenants upload, one payment at a time or all proofs of a month as one ZIP file with a list of the payments.	**HIGH**

NON-FUNCTIONAL REQUIREMENTS

ID	Category	Requirement	Priority
NFR-001	**Usability**	The system shall use a simple, intuitive interface that admins and tenants can operate without training.	**HIGH**
NFR-002	**Compatibility**	The system shall run on desktop and mobile devices through a web browser.	**HIGH**
NFR-003	**Security**	The system shall require a username and password for login, with separate access levels for admin, tenant manager, and tenant accounts.	**HIGH**
NFR-004	**Security**	The system shall restrict tenants to viewing only their own personal, room, and payment information.	**HIGH**
NFR-005	**Reliability**	The system shall back up the database every day so records survive a system failure.	**HIGH**
NFR-006	**Storage**	The system shall shrink photos before upload, refuse files over 1 MB, and replace photos older than 12 months with smaller copies, so all records and history logs fit the free hosting plan.	**HIGH**

User Stories

Owner User Stories

1. As an Owner, I want to view the dashboard so that I can see the overall status of the boarding house.
2. As an Owner, I want to manage rooms so that I can keep room information, prices, capacity, and availability updated.
3. As an Owner, I want to manage tenant records so that I can keep tenant information and rental history organized.
4. As an Owner, I want to view room status so that I can see which rooms are occupied or available.
5. As an Owner, I want to manage payments so that I can record, view, and monitor tenant payment status.
6. As an Owner, I want to generate payment records and receipts so that tenant payments are properly documented.
7. As an Owner, I want to manage tenant concerns so that I can view, respond to, and resolve their concerns.
8. As an Owner, I want to manage announcements so that I can share important information with tenants.
9. As an Owner, I want to verify proof of payment so that I mark a payment as paid only after I confirm it.
10. As an Owner, I want to log in and log out so that only I can access the admin functions.
11. As an Owner, I want to view and correct the utility bills the tenant manager enters so that each tenant's share stays accurate.
12. As an Owner, I want to set one monthly rent for all tenants in Settings and confirm it before it changes so that every tenant pays the same rent and I avoid mistakes.
13. As an Owner, I want to assign an active tenant as the tenant manager so that someone enters the utility bills when I am away.
14. As an Owner, I want to view the history logs so that I can see who changed a record, when, and what changed.
15. As an Owner, I want to download the GCash proofs tenants upload so that I keep my own copy of every payment.
16. As an Owner, I want to see how much storage the system uses so that I know before it runs out.

Tenant User Stories

1. As a Tenant, I want to view my dashboard so that I can see my boarding house information.
2. As a Tenant, I want to view and update my profile and change my profile photo so that my information stays updated.
3. As a Tenant, I want to view my room information so that I can see my assigned room and monthly rent.
4. As a Tenant, I want to view my payment information so that I can check my payment history, balance, and status.
5. As a Tenant, I want to upload proof of payment so that the Owner can verify my payment.
6. As a Tenant, I want to manage my concerns so that I can submit and monitor my concerns and read the Owner's response.
7. As a Tenant, I want to view announcements so that I can stay informed about boarding house updates.
8. As a Tenant, I want to register an account so that I can access the system.
9. As a Tenant, I want to view my receipt so that I have proof of my payment.
10. As a Tenant, I want to log in and log out so that only I can see my account.
11. As a Tenant, I want to see my rent, electric share, and water share so that I know what my

monthly bill covers.
12. As a Tenant, I want to see the utility bills and their photos so that I can check how my share was computed.
13. As a Tenant, I want to view the history of changes to my records so that I can check my bills and payments.

Tenant Manager User Stories
1. As a Tenant Manager, I want to enter the electric bill of each room and of the rest house so that the system computes every tenant's share.
2. As a Tenant Manager, I want to upload a photo of each bill so that the owner and the tenants can check the amounts.
3. As a Tenant Manager, I want to keep all my tenant features so that I can still view and pay my own bill.
